

A&D EZI-Check

Checkweigher and Metal Detection Inspection Systems

Are you complying with supermarket check-weighing and metal detection requirements? Want no more underweights and minimal giveaway?

A&D's innovative EZI-Check™ Inspection Systems have taken the fresh produce sector by storm!

A&D's Japanese designed & built systems offer a top end specification at an entry-level price. With supermarket QA/QC and reporting demands increasing, manufacturers/growers are seeking to reduce 'giveaway' of excess product, whilst ensuring they meet or exceed legal weight requirements. A&D's innovative EZI-Check™ system boasts industry leading SUS304 construction, IP-65 moisture and dust protection, and can move products at high speed and weigh them with up to 0.01g precision. Capable of up to 320 packs per minute, when coupled with a metal detector, it becomes a complete inspection solution with affordable local support.

- **Improves productivity & profitability**
- **Enhances quality control & reporting**
- **Easy USB data capture and networking capabilities**
- **Intuitive touch screen display**
- **Fast, accurate and easy to maintain**
- **Japanese made and locally supported by the manufacturer**
- **& many more benefits!!**

The **EZI-Check™** system is available for demonstration in our Canning Vale Showroom. Please feel free to contact us to make a booking.
